

JUNE 26, 2020 - CAMPUS UPDATE

A Westminster Canterbury-Lynchburg staff member tested positive for the COVID-19 virus. This person was exposed to the virus through a friend in the greater Lynchburg community. The staff member has been out of work and not on our campus since June 12. The individual does not work in a resident living area; meaning, prior to June 12, they did not work in independent living, assisted living or healthcare.

We do not believe there is a trace to other staff members or residents at this time. We continue to work with the local health department for guidance. Our staff member is okay and we expect a full recovery.

Please remember the importance of properly wearing your mask to ensure we don't spread this virus to others.
