

## **CAMPUS UPDATE - August 7, 2020**

Westminster Canterbury of Lynchburg learned today that one of our staff members in Environmental Services tested positive for the COVID-19 virus. This employee worked in apartments in the independent living areas. Due to our team member's appropriate use of personal protective equipment while working, we are not going to quarantine any residents at this time.

This person last worked Tuesday, August 4. Residents who may have had contact with this employee will be notified individually.

The staff member was not feeling well and went to a physician on their own. This case was not identified in our third round of testing. This is the ninth staff member to test positive since the beginning of July.

**We will perform a fourth round of testing for COVID-19 on August 10.**  
We are required by the State of Virginia and CMS/Medicare to test the residents of our healthcare and assisted living neighborhoods, as well as all employees.

Thank you for your patience and understanding during these unprecedented times.
